**DETAILED ACTION**

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 14, 16, 17 and 34 to 46 are rejected under 35 U.S.C. 103(a) as being unpatentable over Page (2004/0154528).

The Page reference teaches a method of gemstone formation. A source of carbon is sublimed in a chamber in order to make a gemstone. The gem is then faceted and polished to create a finished surface, note entire reference. The reference further teaches that cremated remains are known sources of carbon to create a gemstone, note entire reference. The Page reference teaches the halogen purification technique

of carbon to graphite, note reference. The sole difference between the instant claims and the prior art is the addition of carbon. However, it would have been obvious to one of ordinary skill in the art to determine through routine experimentations the optimum, operable adding material in the reference in order to create a larger diamond. It is noted, that the reference does in fact teach addition of materials to the cremated remains.

Applicant's arguments with respect to claim 14, 16, 17, and 34-46 have been considered but are moot in view of the new ground(s) of rejection.
